

Declaration on Phthalate- and Bisphenol-Free Plastics

Italcoppie Sensori Srl

declares that

based on the declarations received from suppliers of raw materials and/or components, no type of bisphenol (BPA, hazardous bisphenols other than BPA and hazardous bisphenol derivatives) and/or phthalates/plasticizers is intentionally used or added as ingredients in the marketed products.

Regarding the entry into force in July 2026 of the prohibition on the use of Bisphenol A in products in contact with food, we confirm compliance with Regulation 2024/3190, which amends Regulation (EU) No. 10/2011 and repeals Regulation (EU) 2018/213.

With reference to the 5 phthalates authorized for use in plastic materials in contact with food (DBP, BBP, DEHP, DINP, DIDP), Regulation (EU) 2023/1442, which amends Regulation (EU) 10/2011, has updated the specific migration limits (SML) of the following phthalates:

- Dibutyl phthalate (CAS No.: 84-74-2) → 0.12 mg/kg
- Benzyl butyl phthalate (CAS No.: 85-68-7) → 6 mg/kg
- Bis(2-ethylhexyl) phthalate (CAS No.: 117-81-7) → 0.6 mg/kg

Italcoppie Sensori Srl commits to continuous monitoring and research on the raw materials used, to guarantee compliance with the above declaration and to ensure that potential impurities are in any case below the levels provided for by the various regulations.
